

Sore throat is a common complaint, not just in winter, but in the summer too, especially when there are wide temperature variations. There are many causes to sore throat which mainly exhibits symptoms of redness, swelling, hoarseness and painful swallowing. Sometimes it is caused by a slight irritation, for example, due to exposure to smoke or talking for prolonged periods of time. However, there may also be an inflammation causing the throat soreness. In most cases, it is caused by a virus. When there is inflammation of the oral cavity or throat, we often note painful swelling of the tonsils.

Another common disorder of the oral cavity is mouth ulcers (canker sores). They are small, white or yellowish sores which occur on the tongue, the gums or the mucous membrane (lining) of the mouth and may be very painful. It is not yet entirely known what causes them, but experience shows that they mostly occur in young adults and more commonly among women. Mouth ulcers sometimes cause increased saliva flow and bad breath.

Vinceel® is a unique homeopathic mouth and throat spray which has a **distinct soothing action on the oral and pharyngeal cavities**. It is therefore recommended for all sorts of complaints such as **sore throat, inflamed mucosa and gums, hoarseness and mouth ulcers**. It provides a great advantage of homogeneously distributing the active constituents onto the mucosa without providing unnecessary sugar. The **diversity of Vinceel's ingredients** cover the most important variations of oral and throat inflammatory diseases. As many inflammatory processes of the mouth and throat are due to infections, the addition of *Echinacea* and *Asclepias vincetoxicum* as immunomodulators make all the more sense.

Vinceel®

Voice your relief!

Vinceel® is a unique mouth and throat spray composed of 8 carefully selected ingredients to optimally improve mouth and throat inflammatory conditions with associated pain and hoarseness. These include sore, red and swollen throat as well as the occurrence of canker sores, inflamed and bleeding gums.

Benefits of Vinceel®

- Treats a broad range of mouth and throat conditions
- Supports the body's own defense system in order to assist self-healing, possesses antiviral and antibacterial properties
- Safety and efficacy clinically demonstrated
- Suitable for the entire family (over 5 years old)
- No known medicinal interactions, may be combined with other natural or conventional therapies
- Conveniently packed in an easy to use metered-dose spray
- Pleasant taste and does not cause burning or numbness

Additional information

Known side effects: allergic skin reactions (redness, swelling and pruritus) can occur in very rare cases, in which case, discontinue use of the product.

Contraindication: hypersensitivity to one of the active ingredients, excipients or to plants of the daisy (Compositae) family.

Dosage recommendations

Acute

(recommended at the onset of symptoms)

Adults, 12 years and older:

1 spray into the mouth or throat every 30-60 minutes for a maximum of 12 doses per day.

Children 6 to 11 years old:

1 spray into the mouth or throat every 1-2 hours for a maximum of 8 doses per day.

Young children 1 to 5 years old:

Because this product contains ethanol, it should not be inhaled and is therefore not recommended in children 5 years and younger.

General

(recommended after onset of symptoms)

Adults, 12 years and older:

1 spray into the mouth or throat 3-5 times per day.

Children 6 to 11 years old:

1 spray into the mouth or throat 2 times per day.

Young children 1 to 5 years old:

Because this product contains ethanol, it should not be inhaled and is therefore not recommended in children 5 years and younger.

For spraying, the arm of the bottle has to be directed into the mouth and throat. Do not inhale during spraying. In order to improve effectiveness, keep in mouth for a while before swallowing.

While individual response to Vinceel® will vary according to each person's health status, the severity of the condition being treated, the age, the dosage used, etc., initial relief may be felt within hours. However, Vinceel® should be taken for several days before benefiting from maximum improvement. Consult a health care practitioner if symptoms persist for more than 3 days or worsen.
